Andy,

It looks like we have the green light to submit. Can you verify and process via STICS?

Thanks.

Tim

Subject: RE: GenX Methods Paper Manuscript with Edits

Tim,

Thanks to the scientists for this effort. I read the responses and text. Looks positive for sending to the journal and OW simultaneously.

PS: There were a number of typographical errors put in during the response period, many of which I edited out in the attached.

Bruce D. Rodan

Subject: GenX Methods Paper Manuscript with Edits

Bruce / Suzanne –

Please find attached the revised version of the GenX methods paper on which OW provided comments – both a clean version and marked up version. I have also attached the fact sheet. This is manuscript that OW requested to review again before submission, but we decided yesterday that we would provide a courtesy copy at the same time as submission to the journal. Also, Bruce, you had asked whether this manuscript was impacted by the recent development that Chemours now has standards for some of the compounds that we estimated semi-quantitatively. The answer to that question is that this is not an issue with this manuscript. Please let me know if you have any questions or if you need additional information.

Thank you.
